EOLO Mini 24 S Export

Wall-mounted instant boilers

Thanks to compact dimensions and easy installation EOLO Mini is Immergas ideal solution for new building projects and wherever installation space is limited or must be optimized. The elegant design makes this boiler easily adaptable to any home interior, whatever the style of furnishing.

Mini models are room sealed and fan assisted combi boilers with heat output of 24 kW (20,640 kcal/h) and 28 kW (24,080 kcal/h). All models are equipped with microprocessor driven electronic control board and control panel complete with display and pushbuttons for the regulation of boiler parameters.

Thanks to the reduced consumptions, all EOLO Mini boilers have obtained the 3 stars energy mark (★★★) in compliance with European Directive 92/42/CEE.

EOLO Mini is prearranged for connection to the new (optional) Digital Remote Control; this allows the boiler management from a distance and it includes timer/room thermostat functions, boiler diagnostic functions and thermoregulation functions.

The appliance has an IPX4D electrical insulation degree: this means the boiler is protected against water sprays and high humidity.

1

SPECIFICATIONS - EOLO Mini

Wall-hung boiler both for central heating and instantaneous production of domestic hot water, with sealed room and fan assisted (appliance type C₁₂, C₃₂, C₄₂, C₅₂, C₈₂) with heat outputs of 24 kW (20,640 kcal/h) and 28 kW (24,080 kcal/h), high efficiency and forced water circulation.

The boiler includes:

- stainless steel burner with 12 ramps (24 kW version) or 14 ramps (28 kW version) complete with ignition and detection electrodes, dual-shutter electric gas valve with built-in modulation coil;
- high-efficiency gas/water primary exchanger made of copper and consisting of four pipes connected in series in finned battery protected by non-corroding alloy;
- combustion chamber in steel plate internally insulated with ceramic panels;
- sealed chamber in steel plate with fumes exhaust fan at fixed speed, differential flue pressure switch;
- sanitary water/water exchanger for domestic hot water production, made of stainless steel with 12 plates (24 kW version) or 14 plates (28 kW version);
- hydraulic unit consisting of an electric diverter valve, adjustable speed circulator with built-in air separator, automatic by-pass, system draining union, system filling ball cock;
- domestic water flow switch to detect when domestic hot water is requested;
- diaphragm expansion vessel with capacity of 6 litres (real 4.5) for 24 kW model or 7.5 litres (real 4.5) for 28 kW model with 1 bar preload, 3 bar system safety valve and pressure gauge;
- overheating safety thermostat;
- electronic ignition with ionizing flame control function;
- push buttons (+ and -) for adjusting the central heating tem-

perature, push buttons (+ and -) for adjusting the domestic hot water temperature, main functioning button (Stand-by, Summer, Winter) and reset button;

- control panel equipped with electronic printed control board, with continuous flame modulation in Central Heating and Domestic Hot Water mode and modulation range from:
 - 9.3 to 24 kW (from 8,000 to 20,640 kcal/h) for EOLO Mini 24;
 - 10.5 to 28 kW (from 9,030 to 24,080 kcal/h) for EOLO Mini 28;
- programming boiler operating parameters by means of digital interface;
- auto-diagnosis system with digital visualisation of the temperature, status, functioning mode and error codes on the display;
- central heating ignition delay device, antifreeze protection system (down to -5°C), circulator and diverter valve with anti-lock function, post-circulation function, post-ventilation function, chimney sweep function, pump functioning mode selection;
- set for connection to Remote Digital Control, to timer/room thermostat or to wireless radio timer/room thermostat;
- IP X4D electrical insulation degree;
- (optional) connecting group.

Boiler supplied complete with sampling points for combustion analysis and bottom protection grid.

Class II_{H3+} appliances working with Natural gas and LPG.
CE marking.

The following models are available:

- EOLO Mini 24 Export code 3.016324
- EOLO Mini 28 Export code 3.016326

EOLO Mini 24-28 Export

EOLO Mini 24 S Export

EOLO Mini S is the wall-hung room sealed fan assisted boiler for central heating only prearranged for connection to an external diverter valve.

Easy installation makes EOLO Mini S Immergas ideal solution for new building projects and wherever installation space is limited or must be optimized.

EOLO Mini S is a room sealed and fan assisted boiler with an heat output of 24 kW (20,640 kcal/h), equipped with microprocessor driven electronic control board and control panel with display and pushbuttons for the regulation of boiler parameters.

EOLO Mini S is prearranged for connection to the new (optional) Digital Remote Control; this allows the boiler management from a distance and it includes timer/room thermostat functions, boiler diagnostic functions and thermoregulation functions.

Thanks to the reduced consumptions, all EOLO Mini S boilers have obtained the 3 stars energy mark (★ ★ ★) in compliance with European Directive 92/42/CEE.

The appliance has an IPX4D electrical insulation degree: this means the boiler is protected against water sprays and high humidity.

1.1

SPECIFICATIONS - EOLO Mini S

Wall-hung boiler for central heating only with sealed room and fan assisted (appliance type C₁₂, C₃₂, C₄₂, C₅₂, C₈₂), heat output of 24 kW (20,640 kcal/h), high efficiency, forced water circulation and prearrangement for external diverter valve.

The boiler consists of:

- 12 ramps stainless steel burner complete with ignition and detection electrodes, dual-shutter electric gas valve with built-in modulation coil;
- high-efficiency gas/water primary exchanger made of copper and consisting of four pipes connected in series in finned battery protected by non-corroding alloy;
- combustion chamber in steel plate internally insulated with ceramic panels;
- sealed chamber in steel plate with fumes exhaust fan at fixed speed, differential pressure switch;
- hydraulic unit consisting of adjustable speed circulator with built-in air separator, automatic by-pass, system draining union, system filling ball cock;
- 6 litres (real 4.5) diaphragm expansion vessel with 1 bar preload, 3 bar system safety valve and pressure gauge;
- overheating safety thermostat;
- electronic ignition with ionizing flame control function;
- push buttons (+ and -) for adjusting the central heating temperature, push buttons (+ and -) for adjusting the domestic hot water temperature (in case of external storage tank installation), main functioning button with Stand-by / Summer (in case of external storage tank installation) /

Winter mode and reset button;

- control panel equipped with electronic printed control board with continuous flame modulation from 9.3 to 24 kW (from 8,000 to 20,640 kcal/h);
- programming boiler operating parameters by means of digital interface;
- auto-diagnosis system with digital visualisation of the temperature, status, functioning mode and error codes on the display;
- central heating ignition delay device, antifreeze protection system (down to -5°C), circulator anti-lock function, post-circulation function, post-ventilation function, chimney sweep function, pump functioning mode selection;
- set for connection to Remote Digital Control, to timer/room thermostat or to wireless radio timer/room thermostat;
- IP X4D electrical insulation degree;
- (optional) connecting group.

Boiler supplied complete with sampling points for combustion analysis and bottom protection grid.

Class II_{2H3+} appliances working with Natural gas and LPG.
CE marking.

CIRCULATOR HEAD AND FLOW RATE GRAPH

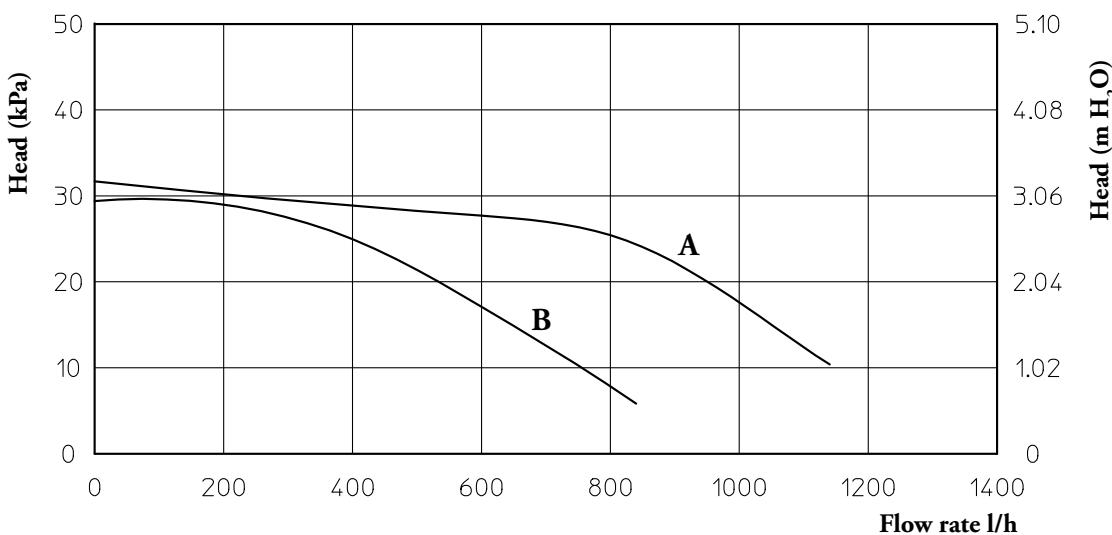

The EOLO Mini boilers are supplied with the circulator incorporated. The circulator is already fitted with a condenser. The graph shows the system's available head (with automatic

by-pass) which depends on the flow rate. To optimize boiler operation, the circulation pump in new systems (single-pipe and module) should be used at top speed.

IL PRESENTE CERTIFICATO ANNULLA E SOSTITUISCE IL PRECEDENTE DEL
This Certificate cancels and replaces the previous one of

During their working life, the performances of the products are influenced by external factors such as the hardness of the domestic water, the weather conditions, scaling in the system, etc. The data indicated in this brochure refer to new products, installed and used in compliance with the current standards in force. NOTE: remember to have your appliance periodically serviced.

Immergas reserves the right to make all modifications to the models considered necessary for product development without prior notice.
